the juiced guys I know.		
That's right. And I don't have the best genetics or diet, it all comes down to one hormone.		

1: Explain.

2: IGF-1 is the actual hormone that builds muscle. Not test or HGH. They just boost IGF-1

1: Damn, I also heard that WADA banned IGF-1 because it was too unfair.

2: Exactly, but the injectable form is illegal and not worth the risk at ALL

1: I wasn't going to touch a needle anyway...so is there a way I can boost my IGF-1?

2: Yes there is, with 191XT. They engineered an oral spray ~~that sends IGF-1 straight into your bloodstream~~ that boosts IGF-1 levels. 6 sprays under your tongue every night. No prescriptions or needles, fully legal. And man, it's like it gave me a second round of newbie gains.

1: Fucking insane bro AND they got a ~~lifetime guarantee~~ 90-day guarantee. I'll drop the link below for the men who are tired of being outpaced by fake natties.
